

## ***Cray Fish – Spey Style***

### **Materials**

**Hook:** Daiichi 2161 Salmon Hook OR (Dai-Riki 700 Streamer Hook 4X long 6 or 8)

**Hackle:** Burnt Furnace Schlappen (opt Orange Marabou tail)

**Body:** Rust Ice Dub

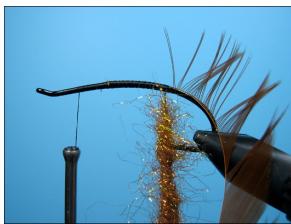

**Wing:** Brown Mallard Flank

**Step 1:** Secure your hook in the vise and wrap thread back to the hook point.

**Step 2:** Tie the hackle in by the tip. Strip one side of the hackle be sure to tie it in so that when it is wrapped or *palmered*, the feather barbs will be angled toward the rear of the fly.

**Step 3:** Use a dubbing loop and applying the dubbing so that not all of the fibers will be "spun" into the loop.

**Step 4:** Wrap your dubbing up the hook to the thread.

**Step 5:** Palmer the hackle up the shank to the thread. Secure the hackle with a few wraps of thread and trim any excess.

**Step 6:** The final step is to apply the wing. Apply the wing so that it sits flat and directly on top of the shank. cement.

Now you have a fully functional spey fly that can be fished for a variety of species!

The finished fly

If a more traditional streamer is more your style, substitute a 4XL streamer hook for a salmon hook. Use burnt orange marabou for a tail and follow the same instructions.
