

## KKM PMD

### History of this fly:

Sherry Steele Developed this PMD Dry Fly from a bug Karen Kreft found emerging on the Metolius River Oregon. This idea was hatched while camping on the river. Wait for the spinner fall; fish it on top and just under the surface as a cripple.

**Thread:** Orange 8/0 UNI

**Hook:** Dry Fly – TMC 2312 #16, #18, & smaller if you can (or equivalent)

**Tail:** Grey Spotted hackle fibers

**Body:** Orange turkey quill

**Thorax:** Brownish/Gold Antron Sparkle Dubbing

**Wing:** White Para Post Wing – use fibers that reflect and sparkle

Techniques used in this fly:

- 1) Handling Hackle fibers
- 2) Quill body
- 3) Synthetic wing fiber handling & selection
- 4) Thorax is important to use light amount of dubbing so the orange thread shows through.
